## PROJECTS

### Metaloxides Glass Nanocomposites (10/2019 - 04/2020)

- Due to properties of nanocomposites, our motto was to form a battery like material which would perform as similar to battery.
- A experimental setup was done where we used four probe, RLC meter bridge and temperature controller.
- We also have sent our sample for the further verification to the NBU, after verifying we had to follow our remaining steps.
- Unfortunately we have not received the verified result due to sudden pandemic going on which caused to stop our further experiment.

### PERSONAL PROJECT (10/2021 - 10/2021)
